SHRUTI VIKAS BADGUJAR

Java Backend Developer • Spring Boot • Angular • Full-Stack Developer

Pune, Maharashtra, India • +91 9529849898 • shrutibadgujar18@gmail.com • github.com/badgujarshruti • linkedin.com/in/shruti-badgujar-113a87259

PROFESSIONAL SUMMARY

Results-driven final-year Computer Engineering student with proven full-stack expertise in Java, Spring Boot, and Angular. Delivered 12+ production-grade software projects as a freelance developer spanning education, booking, and business automation domains. Proficient in building scalable RESTful APIs, implementing JWT-based security, and writing high-coverage test suites with JUnit 5 & Mockito. Competitive programmer with 1,300+ problems solved on CodeChef. Seeking an SDE role to engineer high-performance, test-driven backend systems.

TECHNICAL SKILLS

Backend	Java, Spring Boot, Spring Security, RESTful APIs, JDBC, JPA/Hibernate, Servlets
Frontend	Angular, TypeScript, HTML5, CSS3, JavaScript, Bootstrap
Databases	MySQL, PostgreSQL — schema design, indexing, JOIN optimisation
Testing	JUnit 5, Mockito, pytest — unit & integration testing, 80%+ coverage
CS Core	Data Structures & Algorithms, OOP, DBMS, Operating Systems
DevOps/Tools	Docker, Git/GitHub, Maven, Postman, IntelliJ IDEA, Apache Tomcat, Linux CLI
Also Familiar	Python, Flask, React.js, Node.js, Express.js, Agile/Scrum

EXPERIENCE

Freelance Software Developer | **Independent — All-Domain Projects** *Jan 2024 – Present • Remote*

- Independently designed and delivered 12+ end-to-end software projects using Java, Spring Boot, React.js, Node.js, Express.js, and MySQL, covering education, booking, and business automation domains.
- Architected normalised relational database schemas and secure REST APIs with JWT authentication and role-based access control, reducing client operational overhead by up to 60%.
- Managed the full SDLC — requirements analysis, development, testing, and deployment — across multiple concurrent client projects, consistently delivering on schedule.
- Automated repetitive business processes through custom software, measurably improving client operational efficiency.

KEY PROJECTS

E-Commerce Order Management System | *Java · Spring Boot · Angular · MySQL · JUnit · Mockito · Docker*

- Engineered a production-grade full-stack order platform supporting product browsing, cart management, and order tracking for ~100 simulated concurrent users.
- Designed a normalised MySQL schema with 8 tables; applied strategic indexing that reduced average API response time by ~35%.
- Implemented JWT-based authentication and role-based access control (Customer & Admin), securing all API endpoints.
- Achieved 80%+ unit test coverage via JUnit 5 & Mockito across 25+ test cases, covering edge cases and failure paths.
- Containerised the Spring Boot application with Docker for consistent local-to-staging deployment.

AI-Powered Teacher Assistant | *Python · Flask · REST API · MySQL · pytest · Data Analysis*

- Built an AI grading engine auto-evaluating quizzes and generating personalised student feedback, cutting manual grading time by 60% across 200+ assessments per semester.
- Developed a data analytics module producing student performance dashboards — accuracy trends, weak-topic heatmaps, and batch-level insights — for data-driven instruction.
- Exposed grading logic as a REST API consumed by an Angular frontend dashboard; integrated MySQL for persistent result storage.

- Wrote pytest unit tests for the scoring engine covering 15+ edge cases including partial and ambiguous inputs.

Chef-Booking Platform | *Java · Spring Boot · JSP · MySQL · JavaMail · Spring Security · JUnit*

- Built a reservation system supporting chef discovery, real-time availability filtering, and booking confirmation for ~50 concurrent users.
- Integrated JavaMail API for automated booking confirmations and reminders, eliminating 100% of manual notification overhead.
- Secured the platform with Spring Security (session-based auth, separate Admin/User roles) and validated double-booking prevention via JUnit tests.

Pharmacy Inventory Management System | *JSP · Servlets · Apache Tomcat · MySQL*

- Built a database-driven inventory system managing 300+ medicine records with automated stock-level alerts and reorder triggers.
- Rewrote 8 critical SQL queries using indexing and JOIN optimisation, reducing average page-load time by ~40% on a 10K-record dataset.
- Implemented role-based login (Admin/Pharmacist) with session management and CSRF protection.

TRAINING & CERTIFICATION

Full-Stack Development Training | **Symbiosis Skills & Professional University, Pune** *Feb 2026 – Apr 2026*

- Completed intensive 3-month training in Java, SQL database management, and Angular frontend development.
- Built full-stack applications with Java backend, SQL databases, and Angular UI; implemented REST integration and authentication flows.

COMPETITIVE PROGRAMMING

1,300+ problems solved on CodeChef across arrays, graphs, dynamic programming, and trees.

- Regularly participates in CodeChef Long Challenges and Weekly Contests, consistently solving 3/4 problems per round.

EDUCATION

B.Tech in Computer Engineering | **R. C. Patel Institute of Technology, Shirpur** *Oct 2022 – Jun 2026*

HSC (Science) | **Z. B. Patil College, Dhule** *Jun 2020 – Apr 2022*

SSC | **Canossa Convent High School, Dhule** *Completed Apr 2020*

CERTIFICATIONS & RECOGNITION

- PyTorch for Deep Learning Bootcamp: Zero to Mastery (Udemy)
- Machine Learning Fundamentals & Beginner — Infosys Springboard
- Google Generative AI Study Jams 2024 • Google Cloud Arcade Facilitator Program
- Full Stack Development — PreGrad • Python Programming — Great Learning
- Zensar SheInspires Hackathon — Participant

CORE COMPETENCIES

Analytical Thinking • Problem Solving • Team Collaboration • Communication • Time Management • Adaptability • Quick Learner
